## PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Machine Learning, Deep Learning, and NLP, with hands-on experience building and evaluating models using Python, TensorFlow, PyTorch, and Scikit-learn. Skilled in data preprocessing, feature engineering, and model evaluation, demonstrated through end-to-end AI/ML projects spanning intrusion detection, text classification, and recommendation systems. Experienced in exploratory data analysis and building deployment-ready applications with Streamlit.

## TECHNICAL SKILLS

**Programming:** Python, SQL

**AI/ML:** Machine Learning, Feature Engineering, Data Preprocessing, Model Evaluation, Hyperparameter Tuning, Regularization, Classification, Regression, Ensemble Learning (XGBoost)

**Deep Learning:** ANN, CNN, RNN, LSTM, GRU, Transformers, Transfer Learning, Model Fine-Tuning

**NLP:** Natural Language Processing, TF-IDF, Text Classification

**Data & Visualization:** Pandas, NumPy, SciPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA)

**Deployment:** Streamlit, Model Deployment

**Tools:** Git, GitHub, Google Colab, VS Code, Jupyter Notebook, Power BI, Microsoft Excel

## EXPERIENCE

**Data Analytics Intern** | UptoSkill

*Dec 2025 – Mar 2026*

- Cleaned, transformed, and analyzed structured datasets using Python, Pandas, and NumPy to support downstream analysis.
- Performed exploratory data analysis (EDA) to identify trends, patterns, and actionable business insights.
- Built interactive dashboards and reports using Power BI and Microsoft Excel to communicate findings to stakeholders.
- Applied data preprocessing techniques, including handling missing values, feature engineering, and data transformation, to improve dataset quality.

**Data Science Virtual Experience Program** | Boston Consulting Group (BCG) – Forage

- Completed a simulated data science case study involving data analysis and preprocessing using Python.
- Built and evaluated machine learning models to address a business-oriented problem statement.
- Generated and communicated business insights through data visualization.

## PROJECTS

**AI-Powered Network Intrusion Detection System** | Python, Scikit-learn, Pandas, Streamlit

- Engineered a multi-class network intrusion detection system using the CIC-IDS2017 dataset, applying feature engineering and model selection across multiple classifiers.
- Achieved 99.9% accuracy and a 1.00 weighted F1-score on the test set; deployed a Streamlit application for real-time attack classification.

**SMS Spam Detection** | Python, Scikit-learn, NLP

- Built an NLP-based spam classification model using TF-IDF vectorization for feature extraction and a Naive Bayes classifier.
- Achieved 97.6% accuracy and a 0.95 macro F1-score on the test dataset.

**Movie Recommendation System** | Python, Pandas, Scikit-learn

- Developed a content-based movie recommendation system using cosine similarity over feature vectors derived from movie metadata.
- Evaluated recommendation quality using Precision@10, achieving a score of 0.93 on the evaluation dataset.

**Retail Sales Forecasting** | Python, XGBoost, Scikit-learn

- Developed and compared regression models to forecast retail sales using historical transaction data.
- Achieved best performance with XGBoost (RMSE: 4931.76, MAE: 4374.29), outperforming baseline models.

## EDUCATION

**Sam Global University, Bhopal, Madhya Pradesh, India**

*Bachelor of Technology (B.Tech) in Computer Science Engineering | CGPA: 7.85/10 2023 – 2027*
