

Nagendra Kushwaha

Data Scientist | Machine Learning

+91 8817036391 | shibbuk707@gmail.com | <https://www.linkedin.com/in/nagendra-kushwaha-165ba2296/> | <https://github.com/Nagendrakushwaha>

PROFESSIONAL SUMMARY

Data Scientist with hands-on experience in Python, SQL, and the end-to-end machine learning lifecycle, from data cleaning and exploratory data analysis to model training, evaluation, and deployment. Built and deployed multiple machine learning projects spanning classification, NLP, and time-series forecasting using Scikit-learn, XGBoost, and Streamlit. Skilled in translating raw data into actionable insights through statistical analysis and visualization tools such as Power BI and Tableau.

TECHNICAL SKILLS

Programming & Libraries: Python, NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, Keras

SQL & Databases: PostgreSQL, MySQL, BigQuery, Query Optimization

Machine Learning: Regression, Classification, Clustering, Ensemble Methods, XGBoost, Feature Engineering, Model Evaluation

Deep Learning: ANN, CNN, RNN/LSTM, GRU, Transformers, Transfer Learning, Model Fine-Tuning, Regularization

NLP: spaCy, NLTK, Hugging Face Transformers, BERT, Named Entity Recognition, Sentiment Analysis

Data Analysis & Visualization: Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Tableau, Power BI, Matplotlib, Seaborn, Plotly

Tools & Platforms: Git, Docker, Kubernetes, Spark, MLflow, Google Colab, VS Code

EXPERIENCE

Data Analytics Intern — UptoSkill

Dec 2025 – Mar 2026

- Cleaned, transformed, and analyzed structured datasets using Python, Pandas, and NumPy to support downstream analysis.
- Performed exploratory data analysis (EDA) to identify trends, patterns, and actionable insights.
- Built interactive dashboards and reports in Power BI and Microsoft Excel for data visualization and stakeholder reporting.
- Applied data preprocessing techniques, including missing-value handling, feature engineering, and data transformation.
- Collaborated on data-driven projects, following industry best practices for analysis and reporting.

Data Science Virtual Experience Program — Boston Consulting Group (via Forage)

- Performed data analysis and preprocessing using Python on a simulated business dataset.
- Built and evaluated machine learning models to address a defined business problem.
- Generated business insights through data visualization for stakeholder communication.

PROJECTS

AI-Powered Network Intrusion Detection System | Python, Scikit-learn, Pandas, Streamlit

- Developed a multi-class network intrusion detection system on the CIC-IDS2017 dataset using feature engineering and model optimization.
- Achieved 99.9% accuracy and a 1.00 weighted F1-score; deployed a Streamlit application for real-time attack prediction.

SMS Spam Detection | Python, Scikit-learn, NLP

- Built an NLP-based spam detection model using TF-IDF vectorization and Naive Bayes.
- Achieved 97.6% accuracy and a 0.95 macro F1-score on the test dataset.

Movie Recommendation System | Python, Pandas, Scikit-learn

- Developed a content-based movie recommendation system using cosine similarity and feature engineering.
- Achieved 94.8% recommendation accuracy with 0.93 precision@10 on the evaluation dataset.

Retail Sales Forecasting | Python, XGBoost, Scikit-learn

- Developed and compared machine learning models to forecast retail sales from historical transaction data.
- Best-performing model (XGBoost) achieved RMSE of 4931.76 and MAE of 4374.29, outperforming baseline models.

EDUCATION

Sam Global University, Bhopal, Madhya Pradesh, India

2023 – 2027

Bachelor of Technology (B.Tech) in Computer Science Engineering | CGPA: 7.85/10

CERTIFICATIONS

- SQL & NoSQL — L&T EduTech
- AI/ML — L&T EduTech
- Data Analysis with Python — IBM SkillsBuild
